

BISWAJIT JANA

Full Stack Software Engineer

+91 9033638853 | janabiswajit139@gmail.com | [Portfolio](#) | Rajkot

PROFESSIONAL SUMMARY

2+ years full-stack software developer skilled in Backend, ReactJS, and RESTful APIs. Delivers scalable, secure products end-to-end—from DB schema and backend services to modern UI. Proficient in MySQL, OOP, MVC, and Python (pandas) for data analysis, with strong problem solving and communication.

TECHNICAL SKILLS

Programming Languages: PHP, Java, Python, nodeJs

Frameworks: Laravel, ReactJS, Bootstrap, fastAPI

Frontend: JavaScript, HTML, CSS

Tools: QuickBase CRM, Jupyter Notebook, cursor.ai, [claude.ai](#), Antigravity

Databases: SQL, MySQL, postgres

Methodologies: OOP, MVC Architecture, RESTful Web Development, Data Structures and Algorithms, API Integration

Others: Effective Communication, Problem Solving, Data Analysis

PROFESSIONAL EXPERIENCE (2+ YEARS)

Software Developer | Oct 2023 - Present

Techxperts (Creative Web) | Rajkot

- Led full-stack development (Laravel, ReactJS), shipping secure, scalable features and configurable backend modules that cut hard-coded logic.
- Built RESTful APIs with auth, validation, and third-party integrations, cutting manual operations 95%.
- Improved data integrity 80% via Python/pandas anomaly detection, and cut API latency 30% / lifted uptime 20% through code reviews and MVC best practices.
- Built an AI meeting-intelligence tool (solo) combining real-time speech-to-text, speaker diarization, and voice emotion detection.
- Automated utility-verification calls with a voice AI agent (Retell AI, Twilio, FastAPI), cutting out manual call handling.

PROJECTS

Data Integration Automation | Techxperts (Creative Web)

- Built middleware and API layers to ingest multi-source data into the CRM, cutting manual updates 100% and lifting data accuracy 98%.
- Built a config-driven filtering module that replaced hard-coded parameters across APIs with varying filter sets.

Scalable Web Applications Platform | Techxperts (Creative Web)

- Designed and deployed multi-tenant apps (ReactJS, Laravel), improving page load times ~30% for 10k+ active users.
- Added monitoring and test suites, cutting production defects ~35%.

Emotion Intelligence | Techxperts (Creative Web)

- Built a real-time meeting app (PyQt6) combining speaker diarization, transcription (Whisper), and voice emotion detection in one pipeline.
- Added LLM topic detection (Groq Llama 3.3) and a custom speaker-tracking system using embedding similarity.

Gold Chain Manufacturing Tracker — Personal Project

- Built a production-tracking system for a jewellery business (PM Jewellers), replacing paper logs with lot-based gold issuance, staged tracking, and RBAC.
- Kept loss calculations backend-only (Node.js) for settlement accuracy; deployed on DigitalOcean with Nginx/PM2.

SmartBookmark Manager — Personal Project

- Built a full-stack bookmark app (Next.js, Supabase, TypeScript) with Google OAuth, real-time cross-tab sync, and smart tagging.
- Enforced bookmark privacy with Supabase Row-Level Security rather than app-layer checks alone, for defense-in-depth.

EDUCATION

Master of Computer Application (MCA) | *May 2023*

Vellore Institute of Technology | *Vellore*

Bachelor of Computer Application (BCA) | *May 2021*

Marwadi University | *Rajkot, Gujarat*
